

## What The Experts Say

An independent research study\* confirmed that youth involved in the First Tee Life Skills Experience (the curriculum delivered at chapters) learn and use life skills on the golf course and transfer these skills to other areas of their life. In fact, 100% of The First Tee participants interviewed said they transferred life skills learned at The First Tee to school. Seventy-eight percent are transferring skills such as decision making, setting goals and managing their emotions from the golf course to other areas of their lives including situations with friends, family, after school activities and jobs. The study also revealed the First Tee Life Skills Experience's ability to impart core values on youth. After participating in the First Tee for three years, 73% reported high confidence in their academic ability and 82% felt confident in their social abilities with peers.
